

I believe that I have the potential to be an excellent member of the Alumni Network Executive Committee and as President I can make the most meaningful and effective contribution. I have a track record of being a creative thinker and have a demonstrated proficiency in communicating those ideas. I have committed myself to promoting the biotechnology community at New York University and in trying to create a meaningful network of biotechnology minded scientists and professionals across the New York metropolitan area. I hope to prove myself further by upholding the ideals of the Alumni Network and bring its goals to completion while expanding its role in the New York Biotechnology community. I believe New York is ready to become a new pillar of Bioscience Business in this country and I hope to be involved in its maturation. Thank you for your consideration.

Bryan Czyzewski
